kingfisher is a family of several species found here nesting within  
pools, bushes, swamps, and near mountains. All a bird  
nesting in swamps. I saw a kingfisher here near  
kingfisher. Very beautiful in the act of gathering on a king

It is important to note that the results of the analysis are not statistically significant at the 5% level. This is due to the small sample size of the data. The results suggest that there is a positive relationship between the variables, but the evidence is not strong enough to reject the null hypothesis.

*Image of Last Will of Barnabus Horton  
(1600-1680)*

The Sole, True, Faithful  
 Descendant-Heir of Barnabus  
 Horton (needing to pursue  
 administrative namechange) and  
 Witness before Abba Jehovah, The  
 True Living God. (The predicament  
 contemporary is not fault of

contemporary is not fault of  
aforementioned.)

This drawing, often labeled in error as Barnabas Horton (1600-1680), is actually of JONATHAN GOLDSMITH HORTON. He was a 3rd great grandson of Barnabas and the last Horton descendant to live in the house before it was torn down in 1878. It was included on a memorial drawing about Barnabas Horton's house in Southold, Long Island. "J. G. Horton Esq" is seen on the jacket at bottom of picture.

## Gmail Account Profile Information:

Birthname has been James E. Horton. In life, my name has actually changed to Jacob. Need, within situation recorded on Youtube channel, is self-evidentiary for name change for administrative records. Since disruption by legal and abuse of process harassments, while caused to be indigent, overburden in malice intent has delayed these intents with very exigent priorities that are obvious from the documentaries.

I still am deciding surname. Publishing a decision at this time would be premature since I am privy to conspiracy to steal my

identity by racketeering and record tampering amongst vicissitudes endured in these exigencies. [For example, I am hearing Christopher Allen, from Massillon, OH, from Lptnk Mnfst Phmna, crying like a little crybaby, discussing HIS intent after downloading to exploit my produced records, without any thought for my interests only selfish malice, for his own misuse, like Curt Cecil... , and to be chosen by mafioso to replace myself in a contest toward this prize... Look, he's black, and that is mad, delusional lunacy. Why is Trump pardoning these to happen?

COP: These pardons must be defied as unlawful by conscientious action!!

(jaakovos)

My name at birth was James Edw.  
Horton. I have exigent cause for  
namechange on administrative  
records according to actual change  
of name in life. Process has been  
administratively obstructed by  
occultic, organized-criminal  
racketeers. I am actively pursuing  
this matter legally, however.  
Name provided here is strictly  
purpose pseudonym. Not real  
name either. I am being  
tampered with and being  
enabled thus to be  
obstructed from my efforts to  
steal, replace, and recover  
the stolen goods of myself  
and others in order to

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental setup and the procedures followed during the study.

3. The third part of the document presents the results of the study, showing the trends and patterns observed in the data. It includes several tables and figures to illustrate the findings.

4. The fourth part of the document discusses the implications of the study and the potential applications of the findings. It highlights the significance of the research and its contribution to the field.

5. The fifth part of the document concludes the study, summarizing the key points and providing a final statement on the overall findings.

6. The sixth part of the document includes a list of references, citing the sources used in the study.

7. The seventh part of the document contains a list of appendices, providing additional information and data related to the study.

8. The eighth part of the document includes a list of figures, showing the visual representation of the data.

9. The ninth part of the document contains a list of tables, providing the numerical data used in the study.

10. The tenth part of the document includes a list of footnotes, providing additional information and clarifications.

$$AC \parallel BQ \Rightarrow \angle A = \angle B \Rightarrow \angle A = \angle B = 45^\circ$$

1. The first step in the process of creating a new product is to identify a market need.

2. The second step is to develop a concept that meets the market need.

3. The third step is to develop a business plan for the new product.

4. The fourth step is to secure financing for the new product.

5. The fifth step is to develop a prototype of the new product.

6. The sixth step is to conduct market testing of the new product.

7. The seventh step is to develop a marketing plan for the new product.

8. The eighth step is to launch the new product into the market.

9. The ninth step is to monitor the performance of the new product.

10. The tenth step is to make adjustments to the new product as needed.

11. The eleventh step is to evaluate the success of the new product.

12. The twelfth step is to discontinue the new product if it is not successful.

13. The thirteenth step is to learn from the experience of the new product.

14. The fourteenth step is to apply the lessons learned to future product development.

15. The fifteenth step is to repeat the process for the next new product.

16. The sixteenth step is to continue to improve the product development process.

17. The seventeenth step is to stay up-to-date on the latest product development trends.

18. The eighteenth step is to network with other product developers.

19. The nineteenth step is to seek out new opportunities for product development.

20. The twentieth step is to keep the product development process flexible and adaptable.

21. The twenty-first step is to be patient and persistent in the product development process.

22. The twenty-second step is to celebrate the success of the new product.

23. The twenty-third step is to share the success of the new product with others.

## LOCAL HISTORY ARTICLES

For many years, Monroe County Historical Association Executive Director Amy Leiser wrote a monthly column on local history that was published in the Pocono Record. Here is a collection of those articles, plus occasional articles from other contributors

The early days of 'Penn's Woods'

March 03 , 2009 Filed in: Quakers |

Pennsylvania | People

William Penn was born October 14, 1644 and was n was greeted with large crowds of supporters. Philadelphia was a tolerant and bustling city of 3,000 with merchants, tree-lined streets, and schoothe son of royalist Sir William Penn, a famous Admiral who served in the British Navy

famous Admiral who served in the British Navy.

Young William was raised during the unstable time in England of Oliver Cromwell's reign and the Glorious Revolution. At the age of 15, Penn met Thomas Loe, a Quaker missionary who taught him the Quaker beliefs of pacifism and equality. A few years later, while at school in Oxford, Penn developed his individuality and philosophy of life and became sympathetic to the Quaker religion. Raised an Anglican, Penn converted to Quakerism at the age of 22, much to the extreme disapproval of his father.

The King of England owed William Penn's father £16,000. To repay his debt, King Charles II granted the young Penn 45,000 square miles of land to establish a colony in "regard to the memories and merits of his late father" on March

of land to establish a colony in “regard to the memorie and merits of his late father” on March 4, 1681. The land for this colony was to be located between the 39th and 42nd degrees north latitude and from the start of the Delaware River continuing westward 5 degrees longitude.

Penn first referred to his land as “New Wales” and then “Sylvania” (meaning woods or forest in Latin). King Charles added “Penn” to the title in honor of Admiral Penn. The younger William Penn was only 37 years old when he gained sovereign rule of the new territory known as Pennsylvania.

Penn worked quickly to establish a colony like no other in the New World. He recruited fellow Englishmen of every trade and skill to join him.

Englishmen of every trade and skill to join him.

From simple farmers to wealthy businessmen,

Penn needed every type of settler (or "adventurer," as he called them) to help create a successful colony. In 1682, with his strong Quaker ideals in place, Penn left England for Pennsylvania onboard the ship named the *Welcome*.

Penn created a town at the mouth of the Delaware River to promote commerce and government; he named the town, Philadelphia which was Greek for "city of brotherly love." To ensure his colony would remain peaceful, Penn purchased the land from the local Native Americans. He also comforted groups of Dutch settlers who had already lived along the

Delaware River that his colony was one of acceptance and that they would be free from religious persecution...

Establishing laws and a sound government was crucial to the survival of Pennsylvania. An Assembly was formed in order to develop a government created by the people with laws embodying Quaker ideals, quite a different approach from the laws established in England.

Having an Assembly would ensure that power did not fall into the hands of only one person – including Penn himself. This government was based on Quaker ethics. Two legislative houses would protect citizens' property and business ventures and would impose taxes fairly. All cases were to be heard before a jury, and prisons were designed to focus on correcting behavior rather

designed to focus on correcting behavior rather than merely holding captives. The death penalty was still applicable in cases of treason and murder. After many drafts, Penn wrote The Charter of Privileges in 1701; this document lasted until the start of the American Revolution, when it was replaced by the State Constitution ([https://www.monroehistorical.org/articles\\_files/030809\\_penn.html](https://www.monroehistorical.org/articles_files/030809_penn.html)).

The very first Thanksgiving took place several hundred miles from Philadelphia, and happened

The very first Thanksgiving took place several hundred miles from Philadelphia, and happened about fifty years before William Penn set foot on the soil that became Philadelphia. Nevertheless, this time of year it's easy to wonder what Penn must have thought when he first hopped off the boat in the fall of 1682 after a long voyage from England.

Most of the early descriptions of Pennsylvania relate to the fecundity of the land. These were written as part of an extensive recruiting effort to get more people to settle here. Descriptions detailing thriving crops, animals fattening on rich pasture, and peaches falling from the trees tempted settlers from England.

We also know from correspondence that Penn

We also know from correspondence that Penn was completely smitten with the natural landscape. He wrote “The woods are adorned with lovely flowers . . . I have seen the gardens of London best stored with that sort of beauty but think they may be improved by our woods.”

The England he left behind had beautiful forests and parkland (mostly private,) but fall color was muted at best. The leaves on most deciduous English trees turn brown or tan before falling to the ground.

Yet in the New World different types of maples blazed red and yellow, alongside purple sweetgum and orange sassafras. Sumac glowed, and towering tulip poplars showered golden leaves onto the ground far below. The first few

leaves onto the ground far below. The first few waves of European immigrants would have had a hard time believing their eyes, when the magic trick that is American autumn began to unfold.

It didn't take long for the seeds of the great American trees to get back to Europe, thanks to our own John Bartram. Today the trees of various continents are salted pretty evenly throughout the temperate parts of the globe.

Imagine if Penn hadn't been so taken with the forests he found in the New World. Instead of naming his new territory Penn's Sylvania (Penn's Woods) he might have chosen a different name for the colony, and we would be living someplace else. Pennessee? Penntucky ?

Pennsiana? None have the same ring, and none

Pennsiana? None have the same ring, and none serve as a reminder of the natural beauty of our part of the world (<https://whyy.org/articles/200-years-of-change-to-the-nw-landscape/>).
